

MBA Intern (Job code – Intern MBA)

In this position you will work alongside experts to bring revolutionary products to market that change the way we live and work. You'll be a part of a culture that thrives on innovation, creativity, and a passion to make a difference in the world.

Responsibilities include but are not limited to: developing product positioning, messaging, forecasting, market / trend analyses, pricing, competitive analyses, and product roadmaps. Specifically, you will help develop business and market models to drive the next level of growth for Aerxlabs business.

Communication skills are essential as the Product Management intern must work proactively across various functional areas in the company, including engineering, operations, sales, marketing and finance. An understanding of aviation and product engineering industry is an advantage

Minimum Requirements:

- Ideal candidate should possess a technical degree in EE, CE, CS, or equivalent and is pursuing an MBA at a leading school
- Hands-on experience in multiple aforementioned areas
- Familiarity with product life-cycles
- 1 to 3 years of applicable working experience

Location – Bangalore

Timeframe - Immediate
